MACFormatter: Hardware address format converter

Matthew Dittmer

April 27, 2013

Introduction

The purpose of this application is to convert hardware addresses to colon de-
limited octets. Hardware addresses, or MAC(Media Access Control) addresses,
are expressed in a veritiy of forms. These forms include two octets delemited
by colons, dashes, periods, and no delimiters at all. There are many use for
one form in particular. Two octets separated by colons are expected input for
a vareity of systems including wireless logs and access control lists.
